

Take Your **HR** to the Next Level

Lots of Applications, Less Time

One of the biggest challenges you face daily in your HR department is to accurately match candidate's CVs to job description. Conventional matching tools fail as they detect specific terms in documents, but do not find similar wording. This means key skills and experience can often be overlooked. If you don't want to miss the perfect fit, you still have to manually screen many applications and match them with vacancies.

Which candidates are worth getting on the shortlist? This decision is time-consuming. Once you have filled a position, however, there are still numerous similar candidates in the pool of employees and applicants who could be a great fit for another open position in your company. Potentials that often remain buried. So how can you swiftly find accurate matches and engage candidates before your competition?

semantha: The Best Candidates at the Click of a Button

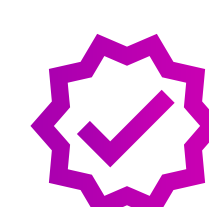

semantha overcomes the weaknesses of conventional matching tools. The software reads and understands large amounts of text in any language, and delivers matches – based on their meaning. What you need several hours for, semantha can do in a few seconds thanks to artificial intelligence – and with no training needed.
